291 Evans Way, Somerville, NJ 08876

Course description - Pass the LEED Exam! This 2-day course supplements individual preparation for anyone interested in passing the Leadership in Energy and Environmental Design (LEED®) Green Associate Exam. After an introduction to the exam format and computer based testing, your instructor will give an overview of how the LEED® rating system works. Next, the group will then examine the core concepts of green building as they relate to each of the rating systems. Finally, your instructor will explain what you need to study after leaving this class to pass the exam. Sample questions and memorization worksheets will be presented and discussed throughout the course. This course is the first step toward becoming LEED® Accredited regardless of your background.

Course objectives -

1. Synergistic Opportunities and LEED® Application Process
2. Project Site Factors
3. Water Management
4. Project Systems and Energy Impacts
5. Acquisition, Installation, and Management of Project Materials
6. Stakeholder Involvement in Innovation
7. Project Surroundings and Public Outreach

Audience - Architects, Developers, Engineers, Builders, Lawyers, Real Estate Professionals, Contractors, Students, Property Managers, and anyone else interested in passing the Green Associate Exam. This exam is the first step toward becoming LEED® Accredited regardless of your background.
